

For stationary operations we further developed the innovation award-winning mobile road weather Sensor MARWIS - this is StaRWIS!

- **Parameters measured**

Road condition (dry, moist, wet, ice, snow, slush, chemically wet), road surface temperature, water film height, dew point temperature, relative humidity, ice percentage, friction (calculated)

- **Measurement technology**

Optical LED transmitters, photo receivers, pyrometer, infrared

- **Product highlights**

non-invasive, plug and play, 100 measurement per second, multifunctional, wireless data transfer, no moving parts

- **Interfaces**

Bluetooth, RS485, CAN-Bus, UMB - protocol

- **Article number**
